GENERATING SOLUTIONS

Your customers count on you for the energy that powers their lives. And you can count on Structural Integrity for solutions that will help you keep the power flowing for years to come.

Why Structural Integrity?

We are a global leader in managing and preventing structural and mechanical failures, and our roots in the nuclear power industry run deep. In fact, Structural Integrity has been a trusted partner to nuclear plants around the world for almost 30 years.

We're unique compared to other consulting firms since we offer comprehensive solutions, from early evaluation to repairs and follow-up. We can also help you proactively predict and mitigate issues before they arise. We'll see your project through from start to finish, always with an eye on regulatory compliance and cost effectiveness.

Our Top 10 Nuclear Services

There are many ways we can help your plant be its best. Over the next several months we'll send information about the following topics:

- ❶ **BWR and PWR Internals** programs, evaluations and inspections
- ❷ **Run/Repair/Replace Decisions** including component operability/JCO support
- ❸ **Fatigue Management** including analysis and monitoring
- ❹ **Seismic Re-evaluation** to address Post Fukushima issues
- ❺ **Underground Pipe & Tank Integrity** program development, data management, inspections, evaluations and monitoring
- ❻ **Materials and Corrosion** evaluation to assist in root cause evaluation
- ❼ **PWSCC/Alloy 600 and IGSCC** mitigation and repairs
- ❽ **Vibration** analysis and instrumentation
- ❾ **Nondestructive examinations** using state of the art equipment and techniques
- ❿ **License Renewal** programs and support

Our Toolkit

Structural Integrity's leading-edge tools and techniques – many developed by our own experts – navigate the most challenging conditions to provide precise, accurate assessments of material condition. Our sophisticated tools allow us to easily organize and manage massive amounts of data to assess and address material condition.

Our Team

Our team includes respected, responsive professionals who play an active role in industry organizations. Our experience can shed light on the most stubborn system and component issues – and we aren't afraid to get our hands dirty. Besides full-scope support, third-party reviews and regulatory interface support are other ways to leverage us.

For a fresh perspective, get the facts from Structural Integrity. We'll bring unmatched talent and technology – and lessons learned from around the world – to your most critical plant issues.
