

**Structural Integrity**  
Associates, Inc.®

# TOP 10 Areas Where We're Generating Solutions

- 1 BWR and PWR Internals
- 2 Run/Repair/Replace Decisions
- 3 Fatigue Management
- 4 Seismic Re-evaluation
- 5 **Underground Pipe & Tank Integrity**
- 6 Materials and Corrosion
- 7 PWSCC/Alloy 600 and IGSCC
- 8 Vibration
- 9 Nondestructive Examination
- 10 License Renewal Support

# Uncover the Facts About Your Buried Piping

Leaks in your plant's underground piping systems are a serious concern – and the risks only grow as equipment ages. Accurately assessing the condition of buried piping is difficult. It also happens to be one of the things we do best at Structural Integrity.

As a global leader on system integrity, we have set a new standard for underground aging management programs. Our state-of-the-art tools and techniques can navigate the most challenging conditions and precisely locate risks related to corrosion and stress. Cutting-edge technology like guided wave and APEC testing helps plant owners make better informed decisions regarding costly excavations and pipe replacement.

Using guidance from NEI and EPRI, Structural Integrity has developed a turnkey solution that includes:

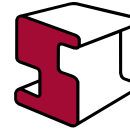

- Planning and program development
- Field inspection
- Data collection and analysis - GWT, Cathodic Protection, Soils analysis
- Risk ranking
- Corrosion control and mitigation, including follow-up monitoring

We also offer complete data management support using innovative software developed by our in-house experts. MAPPro offers sophisticated data analysis for better decision-making. A companion program, MAPProView, uses a state-of-the-art 3-D modeling tool to identify pipe and tank locations that require special attention or can be used to enhance your groundwater protection program.

Our strategic partnership with Diakont, a leader in pipeline inspection robotics, offers plant owners the best in technology and teamwork. Together, we offer underground assessments you can trust – and the support you need to meet regulatory and license renewal requirements.

To uncover the facts about your buried piping, call **1-877-4SI-POWER** or visit our website at [www.structint.com/Top10](http://www.structint.com/Top10).

**You generate the power. We'll generate the solutions.**
